Helping clients find efficiency and effectiveness by applying best practices and technology

- Decades of experience
- Knowledge of major ERPs and applications
- Best practices and control frameworks
- Change management
- Vendor connections
- Industry trends

Budgeting is vital for success

Budget Process

Planning

- Agree on goals
- Set requirements
- Determine approach

Creating

- Establish assumptions
- Draft budget
- Approve budget

Monitoring

- Transaction level and program level
- Monthly rolling forecasts
- “What if” scenarios and reforecasting

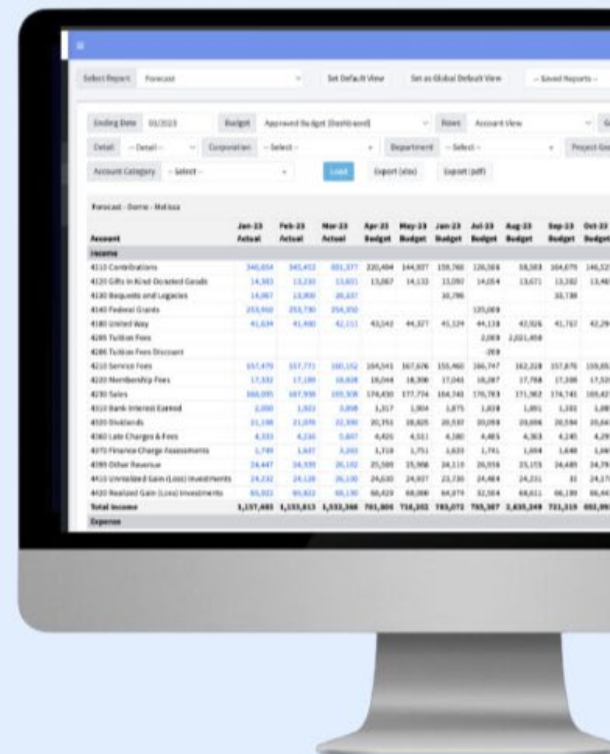

Make Budgeting, Reporting, and Forecasting a *Breeze*.

Get everyone out of spreadsheets and on the same page. Integrate with your ERP or accounting system for seamless collaboration, real-time insights, and faster decision-making—all in one place.

Martus integrates with over 20 accounting and ERP solutions for seamless budgeting and reporting. With automated nightly updates, our pre-built reports plus custom reports and dashboards provide real-time insights for better decision making. User permissions let you control who sees what, keeping data secure and accessible.

Collaborate Seamlessly

Collaborate with leadership for faster planning and flexible budgeting across all departments.

Report Effortlessly

Dashboards and custom reports provide real-time updates you can access anytime, anywhere.

Forecast Confidently

Plan ahead with multiple budget scenarios, budget-to-actuals reporting, and cash flow forecasting.

Planning

What do we want to get out of our budget?

More than numbers

Reflection of anticipated performance

ORGANIZATION
GOALS

CHANGE IN
ACTIVITIES
OR CLIMATE

Approaching the numbers

Expressing the goals through figures

Method

- Overall budget dictated by departments, OR
- Departments are given a bottom line they need to achieve, OR

Goal

- Surplus
- Zero
- Deficit (capital expenditures)

Historical data

- Consistencies
- Anomalies

Envision the process

How to approach the numbers

Team member involvement

Detail level

Reporting needed

Data Integration

Timing

Complexity of structure

Segmentation

- Take advantage of segments/dimensions
 - Grants
 - Projects
 - Customers/Vendors
- Consider:
 - Complexity and time involved
 - How to bring data in to budgeting tool
 - Willingness of budget owners to plan at additional levels

Creating

Making a robust budget easy

Key Activities

Integrations

Collaboration

Modeling with
drivers

Personnel

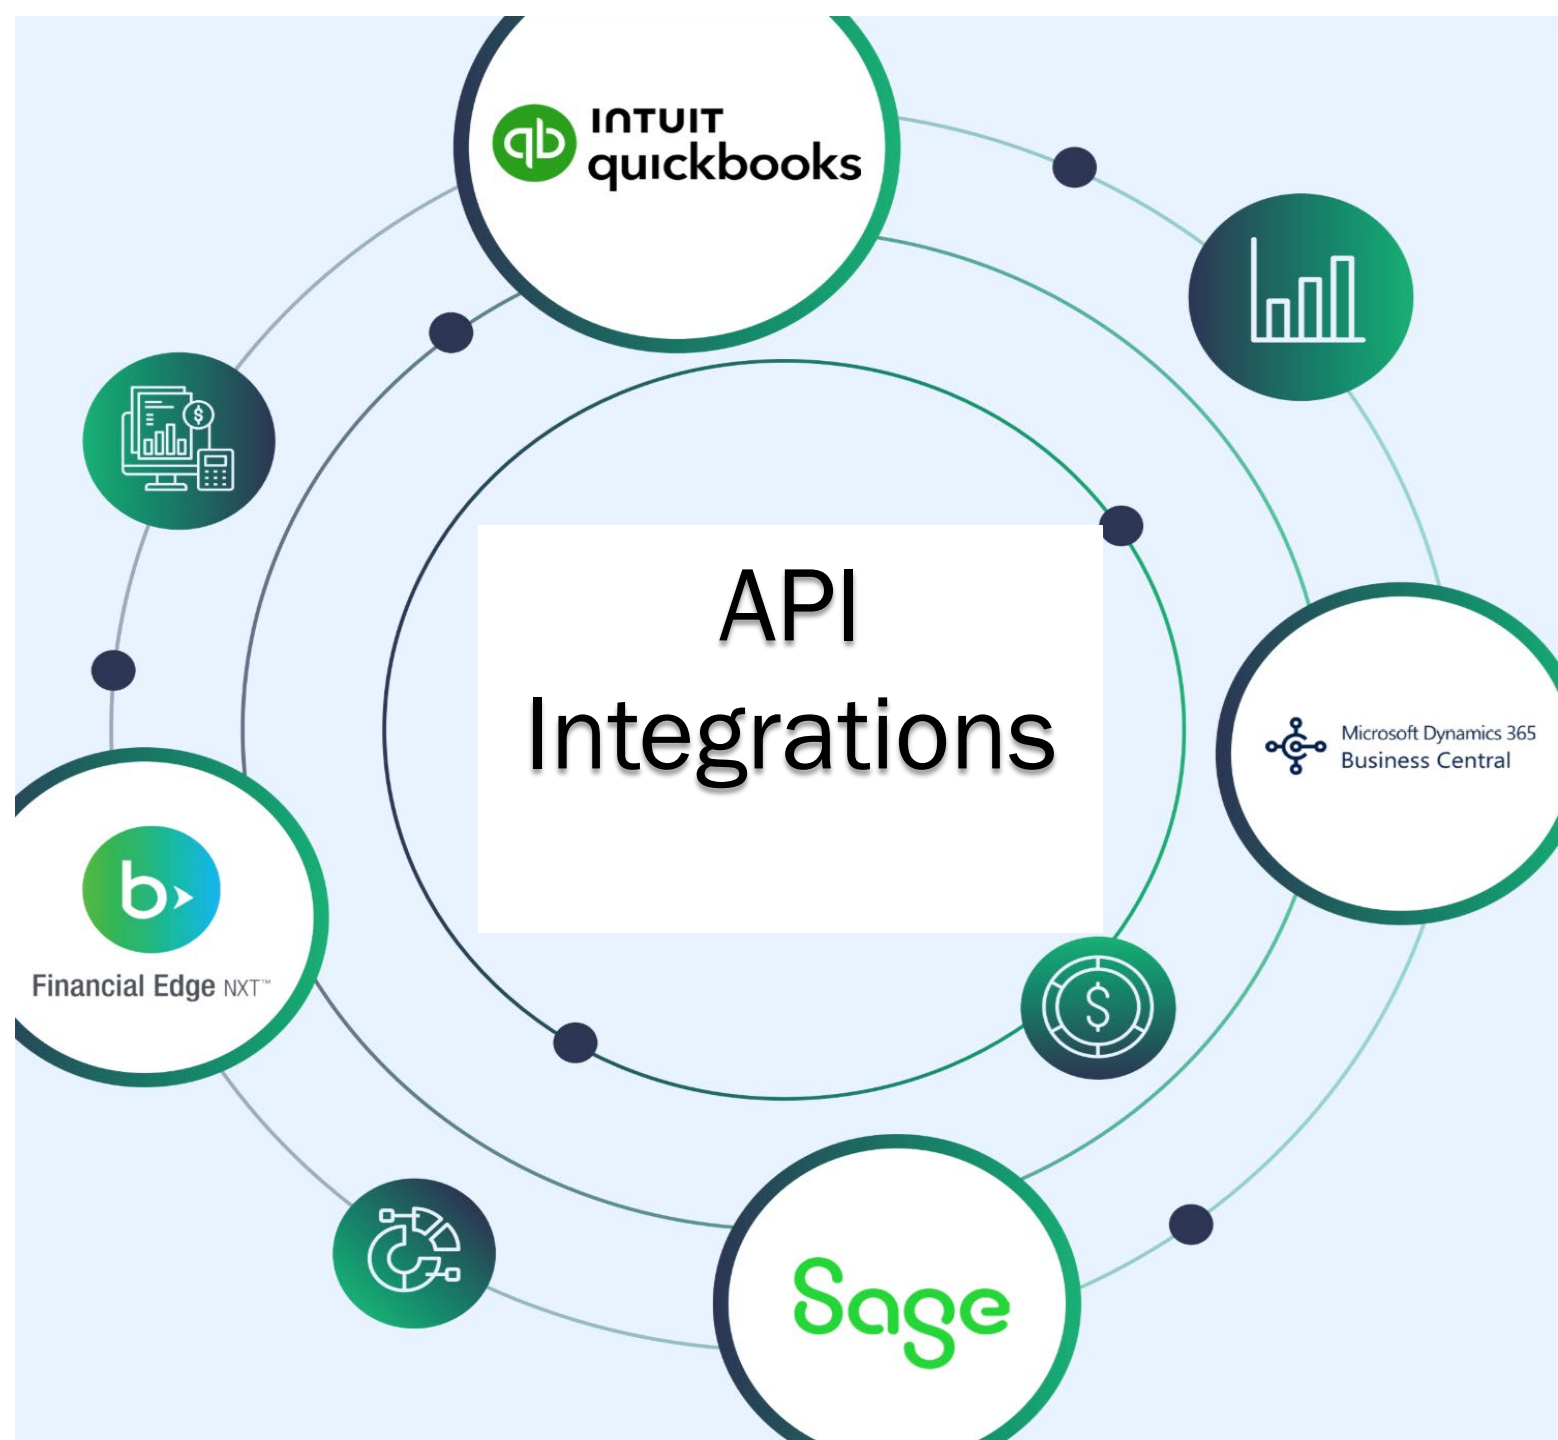

Scenario
planning

Documentation

Easy pre-built APIs with major ERPs for two-way plug and play scheduled or pushed data exchange

OR

Minimal effort CSV export/import functionality for actuals updates as needed

Collaboration is Key

Who To Involve

- Leaders who should be held accountable to financials
- Contributors to significant spend or revenue generators
- Department heads
- Subject matter experts
- Project leads

Modeling

- Set up your drivers
 - Revenue based –
Number of beds or visits
 - Expense based –
Number of users or FTEs
- Audit trail to repeat year after year
- Puts reasoning behind your numbers that can be adjusted
